Deb,
Linda called this morning to discuss and Tom stopped by. We had a 9:00 call with the lab that I and lab management attended and there are various follow-ups from that. We worked on it extensively last week and recognize the urgency and are trying to get it completed as fast as we can and as we can resolve the questions with the lab.

Subject: Central Sands

Hello – Is the above inspection report complete? Pat indicated to me last week that he thought it would be done by last Wednesday. He said Linda told him she wanted to look at it, so I said I thought it could wait a couple of days until she returned to the office (which was today). Please let me know the status. Thanks!
